Ferdinando Carulli ble født i Napoli 10. februar 1770. Den første musikkundervisningen fikk han av en prest, og cello var det første instrumentet han lærte å spille.

Senere oppdaget han gitaren, som fra da av ble hans instrument. I oppveksten var det ingen lærer som undervise Carulli på gitar dermed ble han selv lært (autodidakt).

I 1797 etablerte han seg i Leghorn som utøver og gitarlærer. Noen av de tidligste verkene hans ble publisert i Milano rundt 1807. Han skal ha tilbrakt en tid i Venezia, og snart ble han kjent som en fremragende gitarist.

Våren 1808 reiste han til Paris som på denne tiden var verdens musikkhovedstad. Her var han solist ved en rekke konserter og fra samme år tok han permanent opphold der helt til sin død i en alder av 71 år. (1841)

Han giftet seg med en fransk kvinne, Marie-Josephine Boyer i 1801. De fikk sønnen Gustavo, som sammen med Carulli komponerte flere verker for gitar og piano.

Carulli var i sin samtid ansett som en svært begavet og innflytelsesrik gitarlærer og han klarte å gjøre gitaren populær blant borgerskapet i Paris.

Mange gitarister kom til Paris for å studere med Carulli deriblant flere fra Italia. Hans popularitet som gitarlærer ble bare forbigått av Fernando Sor som kom til Paris i 1823.

Verkene han skrev ble flere ganger avvist av musikkforlag i Paris. De var interessert i musikk av enklere karakter og var ikke villige til å ta risiko med å trykke noe som var for vanskelig for den gjennomsnittlige gitarist. Det hevdtes at flere av Carullis største komposisjoner kan ha gått tapt på grunn av dette. Carulli begynte da å publisere sine egne verker selv.

I tillegg til sin egen musikk publiserte han også verker til andre prominente gitarister. Blant annet Filippo Gragnani, som dedikerte tre gitarduetter til Carulli.

Carulli forandret og forbedret også flere sider ved den tidlige gitaren. Dette har vært med på å utvikle gitaren til hva den er i dag, Carulli samarbeidet med instrumentmakeren Lacote som konstruerte flere modeller etter Carullis ideer. Et av disse instrumentene fikk navnet "Decacorde". Instrumentet ble lagd i 1828 etter Carullis design og hadde fire ekstra bassstrenger.

Flere av Carullis elever ble etter hvert kjente musikere som f. eks gitaristen og komponisten Fillipo Gragnani (Carulli dedikerte sitt op. 10 og gitarduetten op. 46 Trois Grande Duos til Gragnani).

I de siste årene av sitt liv komponerte Carulli lite, og spilte sjeldent offentlig.

Han skrev en stor mengde gitarmusikk i løpet av bare tolv år. I alt over fire hundre komposisjoner. Han komponerte gitarkonserter med orkester, kvintetter, kvartetter, trioer for gitar med andre instrumenter, guitarsoloer, duetter og trioer for gitar.

I 1810 skrev han sin "Methode Complète pour Guitare" opus 27, publisert av i to bind. Denne gitarskolen ble svært utbredt i hans samtid.

Gitaren på Carullis tid

Det vanligste strengeinstrumentet i Europa rundt 1750, som ble “plukket” eller spilt med høyre hånds fingre, var Barokkgitaren. Instrumentet var populært og utbredt i alle de toneangivende landene som Italia, Frankrike, England og Spania. Selv om en samtidig kilde skrev at instrumentet var bråkete, tiltrak seg vulgære lyttere og hadde en generell korrumperende innflytelse – hadde instrumentet overtatt luttens dominerende plass og ved slutten av Barokken var instrumentet i sentrum av den musikalske “mainstreamen”.

Barokkgitaren hadde fem “kor” dvs. fem doble strenger (Første streng kunne også være enkel streng). Ulike stemninger var vanlig avhengig av enten komponist, land eller hva slags musikk som ble spilt. Det vanligste var å stemme enten unisont eller i oktaver. De tre første korene ble som oftest stemt unisont, fjerde og femte kor unisont eller i oktaver. Den spanske gitaristen Gaspar Sanz skriver i sin “Instruccion de Musica sobre la guitarra espanola” (1674) at bruk av oktaver i fjerde og femte kor var passende for “bråkete” musikk eller for continuospilling. Å stemme unisont var mer passende for delikat kontrapunktisk musikk.

I siste halvdel av 1700-tallet vokser nye musikkidealer fram, den ”Galante” og ”Klassiske” stilene blir dominerende. Gitaren forandrer seg i takt med dette og ved begynnelsen av 1800-tallet har gitaren seks strenger som alle er enkle.

Rundt 1790 begynte den seksstrengegitaren å bli vanlig og rundt 1800 var den utbredt og populær. Rundt 1808 var det vanlig med trykket musikk for den seksstrengegitaren. Den kjente Italienske gitarbyggeren Fabricatore begynte å lage moderne seksstrengegitarer rundt 1785-1792 etter tidligere å ha bygget 5-korige barokkgitarer. Andre kilder mener at den seksstrengegitaren omrent samtidig rundt 1785-1792 forekommer i Wien, Napoli og Paris. I denne perioden ble det også laget fem strengegitarer og 6-korige gitarer. Gitaren utviklet seg fra å være en 5-korig (doble strenger) gitar til en med seks enkle strenger.

Fleire gitarlærebøker og publikasjoner fra den andre del av 1700-tallet debatterer hvorvidt gitaren skulle ha enkle eller doble strenger. Flere femkorige gitarer ble ombygget til seksstrengegitarer.

I andre halvdel av 1700-tallet ble tabulaturnotasjonen, som tidligere var vanlig å bruke til å notere gitar og luttmusikk, byttet ut med fiolinnotasjon eller det vi i dag kaller vanlig notasjon.

Utviklingen av strenger er annen viktig faktor som medvirket i utviklingen fra doble til enkle strenger på gitaren. Gut eller tarmstrenger har vært brukt i alle tider siden gitarens opprinnelse. Oppfinnelsen av strenger som var overspunnet av en tynn metalltråd forbedrer klangen og produserer en dypere og kraftigere lyd. Den tidligste referanse til overspunne strenger dateres til 1659. Selv om metalloverspunne strenger, med en kjerne av tarm eller silke, var få fra begynnelsen av 1700-tallet var de ikke vanlige - det var mye arbeid involvert i produksjonen. Metalltråden ble spunnet over hele strengen og ble tilvirket med håndkraft. Dette gjorde strengene ekstremt dyre. Etterhvert som produksjonsmetodene for metalloverspunne strenger ble utviklet ble strengene rimeligere i anskaffelse og resulterte i at strengene ble vanlige i bruk. Båndene på gitarhalsen som tidligere var tarm (gut) ble etter hvert byttet ut med metallbånd da de nye strengene skar seg ned i tarmbåndene.

Første bind av Carullis samlede verker for to gitarer

Carulli skrev over fire hundre verk for gitar. Derav ca. hundre- og femti soloverker, sytti duetter (to gitarer), femti for gitar/ fløyte-violin, førti for gitar/piano, tjue trioer, seks for gitar/sang, tre gitarkonserter og to for tre gitarer .

Verkene for to gitarer spenner fra enkle metodiske duetter for nybegynnere til store konsertstykker. Nå presenteres alle gitarduettene for første gang i en moderne utgave. Originalt ble nesten alle duettene trykket med hver sin individuelle stemme, i denne utgaven er de trykket som partitur. Notebildet er så originalt som mulig, alle tegn er beholdt som opprinnelig skrevet. I de trykte utgavene er det en lang rekke med trykkfeil og disse er rettet opp ut fra Carullis harmoniske og melodiske struktur.

At gitarduettene forekommer helt fra første opus (op.1) og gjennom hele hans produksjon til blant de siste (op.326) indikerer at gitarduetten som format var viktig for Carulli.

Første bind omtaler følgende Opus

<i>Op.1 Trois Petits Duos Nocturnes</i>	Som navnet tilsier er dette tre korte duetter hvor hver har to satser. Stemmene er til dels likeverdige men i duett nr. 3 har gitar to en akkompagnerende rolle.
<i>Op.6 Grande Notturno</i>	Verk i tre satser.
<i>Op.7 Serenade pour deux guitares</i>	Et variasjonsverk hvor tema presenteres i gitar to. Stemmene er likeverdige.
<i>Op.9 Grande Sonate Pour guitare ou lyre avec accompagnement d'une secunde guitar</i>	Et større verk i tre satser hvor annen sats er en tema og variasjonssats. Verket kan enten spilles for sologitar eller som duett med en enkel akkompagnerende andrestemme

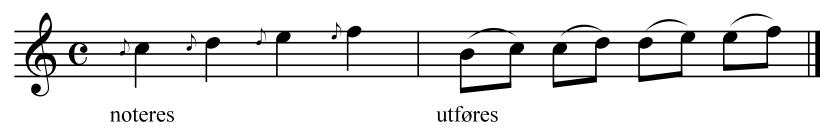

Ornamenter i bind 1

Petites notes eller Appoggiatura

Det ornamentet som forekommer mest i Carullis musikk er Appoggiatura eller Petites notes som han selv kaller det. Han skriver i op.27 Methode Complete annen del at Petites notes er små noter eller ornamenter til musikken. Disse utføres ved at de tar halvparten av den etterfølgende notens verdi. Disse noteres på to måter:

- 1.små noter notert som åttendeler eller sekstendedeler (op.7 og op.9)
2. små noter med strek gjennom notert som åttendel (op.1 og op.6).

Eksempler hentet fra gitarskole op.27

I Methode Complete op.241 er alle eksemplene som viser Petites notes notert med strek gjennom. Petites notes noteres noen ganger som åttendedel noen ganger som sekstendedel.

Carcassi omtaler i sin gitarskole op. 59 fra 1836 også Petites notes eller Appoggiatura som små noter som noen ganger tar halvparten av verdien til den etterfølgende noten. I det tilfelle kalles den for lang Appoggiatura. Når noten spilles med kort varighet kalles den for kort Appoggiatura. Den korte Petites notes eller Appoggiatura er notert med en strek gjennom noten. Petites notes noteres i notene uten buer.

Carcassi op. 59

The image contains three separate musical staves, each showing a different way to notate and perform a grace note (Appoggiatura). In each example, a short note is placed before a longer note, with a horizontal line through the short note indicating it should be played without a bow (noteres) and how it should be performed (utføres).

Carulli op. 241

The image contains two musical staves. The first staff shows a trill starting from a note below the staff, indicated by a plus sign (+). The second staff shows a cadence (Kadens) consisting of a series of eighth-note chords.

TRILLER

Triller og Kadenser

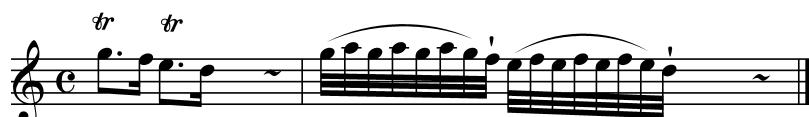

Triller spilles oftest på korte toner og som regel uten etterslag. Lange triller forekommer på lange toner ofte mot slutten av en frase eller mot slutten av satsen og kalles da Kadens. Carulli skriver i op 27 at trillen starter ovenfra. Eksemplene er hentet fra Gitarskole op. 27

Fra op.27

Det var vanlig at lange triller avsluttes med etterslag. Carulli nevner ikke noe om dette i op.27 og eksemplene hans viser heller ikke dette. I kadenstrillene begynner trillen på hovedtonen. I eksemplene fra Carullis op.241 skriver ikke Carulli at trillen skal begynne på tonen over, her begynner trillen på hovedtonen.

Fra op. 241

Lignende eksempel fra Carcassi op. 59

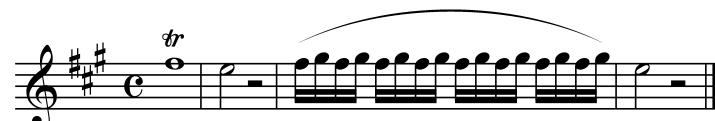

Carcassi skriver i op.59

Triller spilles på den måten at man vekselvis slår an hovedtonen og tonen over eller under for lengre eller kortere tid, alt etter hovedtonens Verdi. Trillen skal begynne og slutte på hovedtonen.

Carulli og Carcassi skriver at det er tre måter å spille triller på

Eksempler fra Carulli op 27

-at hele trillen spilles med bu

-annenhver note spilles med bu

-trillen spilles på to strenger

Carcassi skriver videre at alle triller bør ha en avslutning som består av en halv- eller hel tone under etterfulgt av avslutningstonen.

Eksempel fra Carcassi op. 59

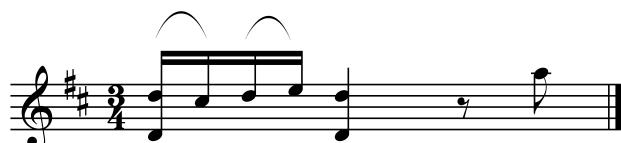

FINGERSETNINGER

I de trykte utgavene fra Carulli er det skrevet inn fingersetninger i noen av stykkene, i andre stykker ikke. Den originale fingersetningen er skrevet inn i på denne måten. **1 2 3 4.** Det er ikke gitt noen anvisninger til streng, Det anvises til posisjon på denne måten 9e.touche (for niende posisjon). 5e. touche osv. Fingersetningen som er lagt til i notene er notert slik. 1, 2, 3, 4, (venstre hand), ①②③④⑤⑥ (streng) Fingersetninger som er skrevet inn er å betrakte som forslag, utøveren står fritt til selv å lage sin egen fingersetning etter egen tolkning.

BUER

I de fire opusene i dette heftet er det notert bindebuer eller legatobuer mellom to toner. Buene er holdt som i originalnotene.

Originale buer er notert

I op.9 forekommer termen «eco» med dette menes bu mellom to toner hvor den ene tonen er på en streng end neste på strengen under. Den første tonen slåes an med høyre hånd den neste slåes an med venstre hånd.

Når det står gruppet to og to noter, den ene gruppen med bue over to noter og stakkato tegn over de to neste eller motsatt, skal de med legatobue spilles på vanlig måte. De to med staccatotegn kan spilles på to strenger og skal spilles tilnærmet legato men tonene slåes an med høyre hånd, de skal ikke spilles staccato.

Buer lagt til i denn utgaven noteres på denne måten. Det vil alltid være ulike meninger om hvor og hvor mange buer som skal spilles. Disse er ment som forslag og kan uteslrides.

DYNAMISKE TEGN

De mest brukte tegnene i de fire opusene:

p, F, sFz, rinf, FF, p, pp, sF, rF.

Rinf: forkortelse for Rinforzando, forkortes *rf* og *rfz*, med økt styrke, kraftig aksentuering av en enkelt tone eller akkord, eller kort, kraftig crescendo.

Cresc., poco, f, dol., dolce, plus lent er også tegn som forekommer. I enkelte satser er fravær av dynamiske tegn påfallende. I begynnelsen av en sats kan det stå et dynamisk tegn og ingen flere – det er ikke meningen at satsen skal spilles uten dynamikk. Utøveren må selv tolke musikken og gi den utformingen han/hun mener er riktig.

III DUETTINO

The musical score consists of five staves of music for two guitars (Guitar 1 and Guitar 2). The first section, labeled "III DUETTINO", begins with a "Largo." tempo. The guitars play eighth-note patterns in 3/4 time. Dynamic markings include *p*, *pp*, *f*, and *sf*. Various performance techniques are indicated by numbers above the notes, such as 0, 1, 2, 3, 4, and ①, ②, ③, ④. The score concludes with a "Fine" at measure 10.

This musical score is for two guitars (Gtr. 1 and Gtr. 2). The music is in treble clef. The first measure (mezzo-forte dynamic) consists of an eighth note followed by a sixteenth-note pair, then another eighth note followed by a sixteenth-note pair with a sharp sign. The second measure (forte dynamic) consists of an eighth note followed by a sixteenth-note pair, then another eighth note followed by a sixteenth-note pair with a sharp sign. Both measures end with a fermata and a repeat sign, indicating that the section should be repeated back to the beginning (D.C.) until the end (Sino al fine).
