Ferdinando Carulli ble født i Napoli 10. februar 1770. Den første musikkundervisningen fikk han av en prest, og cello var det første instrumentet han lærte å spille.

Senere oppdaget han gitaren, som fra da av ble hans instrument. I oppveksten var det ingen lærer som undervise Carulli på gitar dermed ble han selv lært (autodidakt).

I 1797 etablerte han seg i Leghorn som utøver og gitarlærer. Noen av de tidligste verkene hans ble publisert i Milano rundt 1807. Han skal ha tilbrakt en tid i Venezia, og snart ble han kjent som en fremragende gitarist.

Våren 1808 reiste han til Paris som på denne tiden var verdens musikkhovedstad. Her var han solist ved en rekke konserter og fra samme år tok han permanent opphold der helt til sin død i en alder av 71 år. (1841)

Han giftet seg med en fransk kvinne, Marie-Josephine Boyer i 1801. De fikk sønnen Gustavo, som sammen med Carulli komponerte flere verker for gitar og piano.

Carulli var i sin samtid ansett som en svært begavet og innflytelsesrik gitarlærer og han klarte å gjøre gitaren populær blant borgerskapet i Paris.

Mange gitarister kom til Paris for å studere med Carulli deriblant flere fra Italia. Hans popularitet som gitarlærer ble bare forbigått av Fernando Sor som kom til Paris i 1823.

Verkene han skrev ble flere ganger avvist av musikkforlag i Paris. De var interessert i musikk av enklere karakter og var ikke villige til å ta risiko med å trykke noe som var for vanskelig for den gjennomsnittlige gitarist. Det hevdtes at flere av Carullis største komposisjoner kan ha gått tapt på grunn av dette. Carulli begynte da å publisere sine egne verker selv.

I tillegg til sin egen musikk publiserte han også verker til andre prominente gitarister. Blant annet Filippo Gragnani, som dedikerte tre gitarduetter til Carulli.

Carulli forandret og forbedret også flere sider ved den tidlige gitaren. Dette har vært med på å utvikle gitaren til hva den er i dag, Carulli samarbeidet med instrumentmakeren Lacote som konstruerte flere modeller etter Carullis ideer. Et av disse instrumentene fikk navnet "Decacorde". Instrumentet ble lagd i 1828 etter Carullis design og hadde fire ekstra bassstrenger.

Flere av Carullis elever ble etter hvert kjente musikere som f. eks gitaristen og komponisten Fillipo Gragnani (Carulli dedikerte sitt op. 10 og gitarduetten op. 46 Trois Grande Duos til Gragnani).

I de siste årene av sitt liv komponerte Carulli lite, og spilte sjeldent offentlig.

Han skrev en stor mengde gitarmusikk i løpet av bare tolv år. I alt over fire hundre komposisjoner. Han komponerte gitarkonserter med orkester, kvintetter, kvartetter, trioer for gitar med andre instrumenter, guitarsoloer, duetter og trioer for gitar.

I 1810 skrev han sin "Methode Complète pour Guitare" opus 27, publisert av i to bind. Denne gitarskolen ble svært utbredt i hans samtid.

## Gitaren på Carullis tid

Det vanligste strengeinstrumentet i Europa rundt 1750, som ble “plukket” eller spilt med høyre hånds fingre, var Barokkgitaren. Instrumentet var populært og utbredt i alle de toneangivende landene som Italia, Frankrike, England og Spania. Selv om en samtidig kilde skrev at instrumentet var bråkete, tiltrak seg vulgære lyttere og hadde en generell korrumperende innflytelse – hadde instrumentet overtatt luttens dominerende plass og ved slutten av Barokken var instrumentet i sentrum av den musikalske “mainstreamen”.

Barokkgitaren hadde fem “kor” dvs. fem doble strenger (Første streng kunne også være enkel streng). Ulike stemminger var vanlig avhengig av enten komponist, land eller hva slags musikk som ble spilt. Det vanligste var å stemme enten unisont eller i oktaver. De tre første korene ble som oftest stemt unisont, fjerde og femte kor unisont eller i oktaver. Den spanske gitaristen Gaspar Sanz skriver i sin “Instrucción de Musica sobre la guitarra española” (1674) at bruk av oktaver i fjerde og femte kor var passende for “bråkete” musikk eller for continuospilling. Å stemme unisont var mer passende for delikat kontrapunktisk musikk.

I siste halvdel av 1700-tallet vokser nye musikkidealer fram, den ”Galante” og ”Klassiske” stilene blir dominerende. Gitaren forandrer seg i takt med dette og ved begynnelsen av 1800-tallet har gitaren seks strenger som alle er enkle.

Rundt 1790 begynte den seksstengede gitaren å bli vanlig og rundt 1800 var den utbredt og populær. Rundt 1808 var det vanlig med trykket musikk for den seksstengede gitaren. Den kjente Italienske gitarbyggeren Fabricatore begynte å lage moderne seksstrenge gitarer rundt 1785-1792 etter tidligere å ha bygget 5-korige barokkgitarer. Andre kilder mener at den seksstengede gitaren omrent samtidig rundt 1785-1792 forekommer i Wien, Napoli og Paris. I denne perioden ble det også laget fem stengede og 6-korige gitarer. Gitaren utviklet seg fra å være en 5-korig (doble strenger) gitar til en med seks enkle strenger.

Flera gitarlærebøker og publikasjoner fra den andre del av 1700-tallet debatterer hvorvidt gitaren skulle ha enkle eller doble strenger. Flere femkorige gitarer ble ombygget til seksstengede gitarer.

I andre halvdel av 1700-tallet ble tabulaturnotasjonen, som tidligere var vanlig å bruke til å notere gitar og luttmusikk, byttet ut med fiolinnotasjon eller det vi i dag kaller vanlig notasjon.

Utviklingen av strenger er annen viktig faktor som medvirket i utviklingen fra doble til enkle strenger på gitaren. Gut eller tarmstrenger har vært brukt i alle tider siden gitarens opprinnelse. Oppfinnelsen av strenger som var overspunnet av en tynn metalltråd forbedrer klangen og produserer en dypere og kraftigere lyd. Den tidligste referanse til overspunnde strenger dateres til 1659. Selv om metalloverspunnde strenger, med en kjerne av tarm eller silke, var å få fra begynnelsen av 1700-tallet var de ikke vanlige - det var mye arbeid involvert i produksjonen. Metalltråden ble spunnet over hele strengen og ble tilvirket med håndkraft. Dette gjorde strengene ekstremt dyre. Etterhvert som produksjonsmetodene for metalloverspunnde strenger ble utviklet ble strengene rimeligere i anskaffelse og resulterte i at strengene ble vanlige i bruk. Båndene på gitarhalsen som tidligere var tarm (gut) ble etter hvert byttet ut med metallbånd da de nye strengene skar seg ned i tarmbåndene.

## Tredje bind av Carullis samlede verker for to gitarer

Carulli skrev over fire hundre verk for gitar. Derav ca. hundre- og femti soloverker, sytti duetter (to gitarer), femti for gitar/ fløyte-violin, førti for gitar/piano, tjue trioer, seks for gitar/sang, tre gitarkonserter og to for tre gitarer.

Verkene for to gitarer spenner fra enkle metodiske duetter for nybegynnere til store konsertstykker. Nå presenteres alle gitarduettene for første gang i en moderne utgave. Originalt ble nesten alle duettene trykket med hver sin individuelle stemme, i denne utgaven er de trykket som partitur. Notebildet er så originalt som mulig, alle tegn er beholdt som opprinnelig skrevet. I de trykte utgavene er det en lang rekke med trykkfeil og disse er rettet opp ut fra Carullis harmoniske og melodiske struktur.

At gitarduettene forekommer helt fra første opus (op.1) og gjennom hele hans produksjon til blant de siste (op.326) indikerer at gitarduetten som format var viktig for Carulli.

Tredje bind inneholder følgende Opus:

*Op.38 Deux Themes Varies et un RONDEAU Pour deux Guitares*

Inneholder to temaer med variasjoner og en Rondo.

Tema 1 har seks variasjoner.

Tema 2 har fire variasjoner.

*Op.46 Trois Grands Duos Pour deux Guitares Composes, & Dédies A son Ami Filippo Gragnani*

Første og tredje duett er tapt og er dermed ikke med i boken. Duett II har fire satser, tredje sats repeteres etter fjerde sats som er en Largo.

*Op.48 Trois Duos Pour deux Guitares ou Lyres*

Tre Duetter, hver av de inneholder to satser. I andre duett er Sats 2 Tema med to variasjoner og en menuett.

Stemmene til gitar 1 og 2 er tilnærmet likeverdige.

*Op.49 Six Contre-Danses avec les Figures et Troi Valses Pour Guitare seule avec Accompagnement d'une seconde Guitare da-libitum.*

Enkle duetter som kan spilles for en gitar eller med akkompagnement av en annen gitar  
Contre-danses En type landlig folkedans som ble fremført i karakteristiske formasjoner.  
I dobbel linje med menn på den ene siden og kvinner på den andre – geometriske figurer for to, tre eller fire par. Danserne utførte en rekke varierte figurer. Disse dansene ble populære blant adelen og borgerskapet og figurene ble etter hvert standardisert.

*Op.52 Divertissement pour les Commencans ou Choix De 24 Ariettes Connues Arrandees Pour Deux Guitares ou Guitare seule et divisees en quatre Pot-Pourris*

24 enkle metodiske duetter som kan spilles for en gitar eller med akkompagnement av en annen gitar. Arrangert for to gitarer og inndelt i fire deler. Originalnotene inneholder en liste over melodinavn.

# Ornamenter

## Petites notes eller Appoggiatura

Det ornamentet som forekommer mest i Carullis musikk er Appoggiatura eller Petites notes som han selv kaller det. Han skriver i op.27 Methode Complete annen del at Petites notes er små noter eller ornamenter til musikken. Disse utføres ved at de tar halvparten av den etterfølgende notens verdi. Disse noteres på to måter:

1. små noter notert som åttendeler eller sekstendedeler
  2. små noter med strek gjennom notert som åttendel

## Eksempler hentet fra gitarskole op.27

The image shows a musical staff with two measures. The first measure consists of six eighth notes. Below it, the text "noteres" is written. The second measure consists of six eighth notes connected by slurs. Below it, the text "utføres" is written.

The image shows a musical staff with a treble clef and a common time signature (C). A melodic line is written using black and white note heads. Grace notes are indicated by small note heads with a diagonal line through them. Slurs connect groups of notes. Below the staff, the text "noteres" is aligned with the first measure, and "utføres" is aligned with the second measure.

A musical staff in treble clef and common time. The first six notes are eighth notes with stems pointing right, followed by a measure of six eighth notes with stems pointing left. Below the staff, the word "noteres" is centered under the first six notes, and "utføres" is centered under the second measure.

I Methode Complete op.241 er alle eksemplene som viser Petites notes notert med strek gjennom. Petites notes noteres noen ganger som åttendedel noen ganger som sekstendedel.

Carulli skriver at når en finner to, tre eller fire Petites notes sammen kalles de Agremens.

Eksempler fra Carulli op. 27

b)

Carcassi omtaler i sin gitarskole op. 59 fra 1836 også Petites notes eller Appoggiatura som små noter som noen ganger tar halvparten av verdien til den etterfølgende noten. I det tilfelle kalles den for lang Appoggiatura. Når noten spilles med kort varighet kalles den for kort Appoggiatura. Den korte Petites notes eller Appoggiatura er notert med en strek gjennom noten. Petites notes noteres i notene uten buer.

Carcassi op. 59

To Appoggiaturas etter hverandre kalles Petites notes doubles.  
Tre eller fire Appoggiaturas sammen kalles Grouppetto.

Fra Carcassi op.59

The image shows two measures of musical notation in 4/4 time. The first measure consists of sixteenth-note pairs (eighth-note pairs) followed by a rest. The second measure consists of eighth-note pairs followed by a rest. Below the first measure is the instruction "noteres" and below the second measure is "utføres".

Carulli op.241

The image shows two measures of musical notation in common time (C). The first measure consists of sixteenth-note pairs (eighth-note pairs) followed by a rest. The second measure consists of eighth-note pairs followed by a rest. Below the first measure is the instruction "noteres" and below the second measure is "utføres".

## TRILLER

Triller og Kadenser (Op. 27)

Triller spilles oftest på korte toner og som regel uten etterslag. Lange triller forekommer på lange toner ofte mot slutten av en frase eller mot slutten av satsen og kalles da kadens.

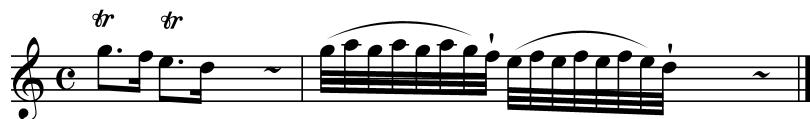

Carulli skriver i op. 27 at trillen starter ovenfra. Eksemplene er hentet fra Gitarskole op. 27

Fra op.27

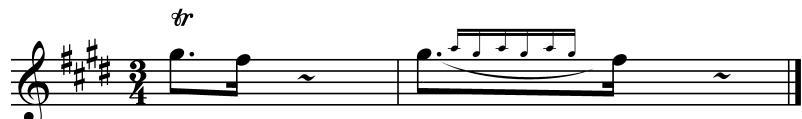

The image shows a measure of musical notation in common time (C) with a key signature of two sharps. It features a trill (tr) starting on the first note of the measure. The trill consists of eighth-note pairs. The measure ends with a half note and a fermata, indicating it should be sustained.

Det var vanlig at lange triller avsluttes med etterslag. Carulli nevner ikke noe om dette i op.27 og eksemplene hans viser heller ikke dette. I kadenstrillene begynner trillen på hovedtonen. I eksemplene fra Carullis op.241 skriver ikke Carulli at trillen skal begynne på tonen over, her begynner trillen på hovedtonen.

Fra op. 241

Lignende eksempel fra Carcassi op. 59

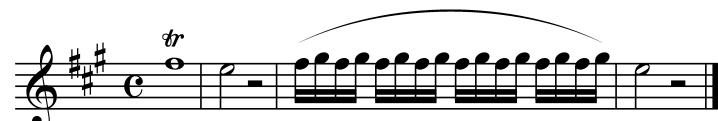

Carcassi skriver i op.59

Triller spilles på den måten at man vekselvis slår an hovedtonen og tonen over eller under for lengre eller kortere tid, alt etter hovedtonens Verdi. Trillen skal begynne og slutte på hovedtonen.

Carulli og Carcassi skriver at det er tre måter å spille triller på

Eksempler fra Carulli op 27

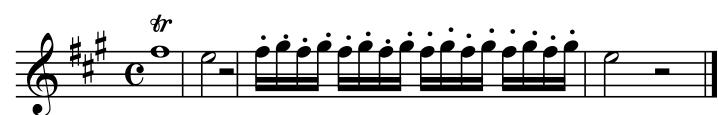

-at hele trillen spilles med buie

-annenhver note spilles med buie

-trillen spilles på to strenger

Carcassi skriver videre at alle triller bør ha en avslutning som består av en halv eller heltone under etterfulgt av avslutningstonen.

Eksempel fra Carcassi op. 59

## FINGERSETTINGER

I de trykte utgavene fra Carulli er det skrevet inn fingersettinger i noen av stykkene, i andre stykker ikke. Den originale fingersettingen er skrevet inn i på denne måten. **1 2 3 4.** Det er ikke gitt noen anvisninger til streng, Det anvises til posisjon på denne måten 9e.touche (for niende posisjon). 5e. touche osv. Fingersettingen som er lagt til i notene er notert slik. 1, 2,3, 4, (venstre hånd), ①②③④⑤⑥ (streng). Disse er å betrakte som forslag, utøveren står fritt til selv å lage sin egen etter egen tolkning.

## BUER

Legatobuene som er notert i originalnotene er skrevet inn uforandret.

«eco»: med dette menes bue mellom to noter som spilles over to strenger.

Når det står gruppert to og to noter, den ene notert med bue og den andre med stakkatotegn/prikker over de to neste eller motsatt, skal de med legatobue spilles på vanlig måte. De to med stakkatotegn/prikker kan spilles på to strenger og skal spilles tilnærmet legato men tonene slåes an med høyre hånd, de skal ikke spilles staccato.

Buer lagt til i denne utgaven noteres på denne måten. Det vil alltid være ulike meninger om hvor og hvor mange buer som skal spilles. Disse er ment som forslag og kan uteslås.

## DYNAMISKE TEGN

De mest brukte tegnene i opusene:

p, F, sFz, rinf, FF, p, pp, sF, rF.

Rinf: forkortelse for Rinforzando, forkortes *rf* og *rfz*, med økt styrke, kraftig aksentuering av en enkelt tone eller akkord, eller kort, kraftig crescendo.

Cresc., poco, f, dol., dolce, plus lent er også tegn som forekommer. I enkelte satser er fravær av dynamiske tegn påfallende. I begynnelsen av en sats kan det stå et dynamisk tegn og ingen flere – det er ikke meningen at satsen skal spilles uten dynamikk. Utøveren må selv tolke musikken og gi den utformingen man selv mener er riktig.
